## Career Objective

---

Self-motivated computer science student passionate about competitive programming and software development. Eager to learn, grow within a dynamic team, and contribute to impactful projects while continuously building technical expertise and staying updated with industry trends.

## Education

---

**KIT - KalaingarKarunanidhi Institute of Technology**

*B.Tech in Computer Science and Business System*

*Sept 2023 - Sept 2027*

*GPA: 7.7*

**Hidayathul Islam Higher Secondary School**

*Higher Secondary*

*June 2021 – July 2023*

*82%*

## Projects

---

### **Ai Powered Freelancing Web-app**

[GitHub Link](#)

- Built a scalable AI-powered freelancing web app using the MERN stack, enabling efficient job matching through skill analysis and secure, role-based user access via JWT authentication.
- Designed responsive, user-friendly interfaces with React.js and Tailwind CSS, and integrated real-time messaging and notifications using Socket.io for better user engagement.

[GitHub Link](#)

### **Personal Portfolio**

- Designed and developed a personal portfolio website using React.js. showcasing projects, skills, and contact information with a responsive, modern UI.
- Implemented React Router for smooth page navigation and deployed the site using GitHub Pages for continuous and reliable web access.

## Skills

---

**Programming Languages:** C, C++, Java and JavaScript

**Web Technologies:** React.js, Node.js and Express.js

**Databases:** SQL, MongoDB

**Version Control System:** Git and GitHub

## Competitive Programming

---

- Solved 600+ algorithmic and data-structure problems across LeetCode, CodeChef, Codeforces, and HackerRank
- Participated in over 100 timed coding contests on LeetCode and CodeChef.
- Experienced in techniques including BFS/DFS, dynamic programming, greedy algorithms, and graph theory.
