AHAMED AMMAR A

Tamilnadu, India | ahamedammar25@gmail.com | 8122613274 | ahamed-ammar | ahamed-ammar

EDUCATION

KIT- KalaignarKarunanidhi Institute of Technology , India 2023 – 2027
B.Tech. Computer Science and Business System, Pre-Final year Current **CGPA: 7.7/10.0**

Coursework: Data Structures and Algorithms, Computer Networks, Operating Systems, Database Management Systems

INPLANT TRAINING

Web Development Intern, LearnLogicify Technologies, Coimbatore, India Dec 2024

- Developed responsive and high-performance web apps using React, Express.js, and RESTful APIs.
- Built reusable frontend components and optimized API response time by 25%.

PROJECTS

Founding AI | Skill Gap Finder and Study Planner and Tracker Live | **Github**

• Built an AI-powered content assistant leveraging **Groq API** to generate contextual responses based on user input, enabling automated content discovery and summarization.
• Designed backend APIs to handle user queries, process prompts, and integrate **LLM** responses efficiently within a modular system architecture.
• Developed scalable backend services using **FastAPI**, ensuring efficient request handling and seamless integration with frontend applications.

Plany app | Mini ERP System Link |Github

- Engineered a **full-stack ERP ordering system** with **JWT-based authentication**, enabling secure user sessions and restricting order placement to authenticated users.
- Designed and developed **scalable RESTful APIs** for order processing, customer management, and dynamic workflows (including **customer-type-based logic**), ensuring clean separation of concerns and maintainability.
- Optimized backend performance and data handling by structuring **efficient database schemas and query patterns**, enabling reliable handling of concurrent order requests and real-time updates.

Expense Tracker | Java Swing Desktop Application Link | Github

- Built a desktop-based expense tracking application using **Java Swing**, enabling users to add, update, delete, and categorize expenses through an interactive GUI with real-time form validation.
- Designed and integrated a relational **SQL** database using **JDBC** for persistent storage of expense records, implementing structured schemas and optimized queries for efficient data retrieval.
- Applied **object-oriented principles** and event-driven programming to manage application logic, database interactions, and monthly/category-wise expense summaries within the desktop application.

TECHNICAL SKILLS

C	Java swing	Java script	SQL
C++	React.js	Git	MongoDB
Java	Express.js	GitHub	
Oops	Node.js	DSA	

CERTIFICATIONS & COURSES

MERN – Fullstack Inplant Training Link | 2024
COURSERA-Get start With Python Link | 2023

COMPETITIVE PROGRAMMING

Leetcode : Max rating - **1739** | Solved problems: **200+** | Top **10.7%** globally | Badges : **3**

Codeforces : Max rating - **1100** | Position: **Newpie** | Solved problems: **300+**

Codechef : Max rating - **1721** | Position : **3** Star | Problems : **450+** | Highest rank **245** in division **2**. **Global Rank** in Codechef.

ACHIEVEMENTS

- Secured a **Top 25 rank** in an inter-college coding hackathon focused on **Data Structures and Algorithms**, competing among **300+ participants**.
- Achieved a **3★ rating on CodeChef**, regularly competing in **Division 2** contests and solving **450+ DSA problems**, demonstrating strong algorithmic and problem-solving skills.
- Secured **Runner-Up position** at a **36-hour inter-college hackathon** held at **Kalaignar Karunanidhi Institute of Technology, India**.

VOLUNTEERING

- Taught Java programming fundamentals to junior students, delivering hands-on exercises to enhance learning and coding skills.
- Coordinated a technical event during the college Technical Symposium, ensuring smooth execution and participant management.
